

FIG. 2 is a top-down view of a circular device. The device has a central circular opening (100) surrounded by a ring (30). The central opening is divided into segments (104, 106, 108, 110, 112, 114, 116). The ring (30) is also divided into segments (33, 38, 42, 44). The device is shown with various internal and external components labeled with numbers.
